COMMERCIAL PORTFOLIO

SALES ANALYTICS

MARGIN MATTERS

Power BI • commercial insight • reporting automation

INDEPENDENT WORK / SYNTHETIC DATA / NO EMPLOYER OR CUSTOMER INFORMATION

31.6%

synthetic gross margin

Is growth still good
growth when margin
falls?

Revenue was up. That still was not the answer.

NET SALES

+8.2%

year on year

GROSS MARGIN

-1.8pp

year on year

Which channels are creating revenue without converting it into margin — and where should pricing or promotion spend change?

Decision audience: sales leadership, commercial finance and channel owners

MODEL IN ONE LINE

ORDER LINE

PROFIT

below its sales share

THE CALL

**Set a margin floor.
Fix returns. Then
promote.**

Resolve listing and returns issues
before adding further marketplace
discount.

£38k

modelled gross-profit uplift
at +3pp margin

PLANNING SCENARIO — NOT A REALISED RESULT

The weekly pack can run 118 minutes faster.

118

MINUTES
BACK EACH
CYCLE

150 min

exports • lookups • margin repairs •
pack rebuild

32 min

controlled
refresh

≈ 94 hours / year

Four checks keep speed from turning into noise.

01	ORDER DEDUPLICATION	Each order ID appears once	CHECK
02	RETURNS RECONCILIATION	Posted returns match sales	CHECK
03	DISCOUNT EXCEPTIONS	Price below the floor is flagged	CHECK
04	MARGIN BRIDGE	Sales-to-margin movements explain	CHECK

THE ANALYST STILL DECIDES

when an exception matters, how the margin movement is explained and what action the channel owner should take.

I connect performance to the decision behind it.

Channels, products and customers only become useful when the analysis changes what happens next.

01 / Find the commercial tension

02 / Make the driver visible

03 / Recommend the next test
